

Be The Leader of the Pack...

The Slave Point play is expanding to the west from the prolific Ladyfern Field along the Alberta/British Columbia border. With JEBCO's new Conroy Creek 3D Seismic Survey, you can lead the way into an under-explored area of this trend in N.E. British Columbia. Using state-of-the-art long offset, wide azimuth acquisition techniques to better image deeper targets and basement structures, this latest JEBCO survey represents the best data ever acquired in this region.
